Skills

Languages: Javascript, Python

Technologies: React.js, Node.js, Tailwind CSS, REST APIs, GitHub, Docker

Databases: MongoDB, MySQL, PostgreSQL

Experience

Extion Infotech

June 2024 - Current

- Full Stack Developer Intern (Virtual)

Projects

Talkwave

<https://talk-wave.onrender.com>

- Developed an advanced social media application using React.js and TanStack Query, optimizing state management to reduce server requests by 35%, boosting user retention by 20%.
- Styled the application with Tailwind CSS and Daisy UI to ensure a modern, responsive design.
- Implemented server-side functionality using Node.js and Express.js, with MongoDB for data management and storage.
- Integrated JWT-based user authentication for secure login and session management.
- Enabled dynamic post creation and real-time updates, including text and image posts, comments, likes, and mood-based content display.
- Added key social features such as user profiles, notifications, following/unfollowing, and profile updates to enhance user interaction and engagement.

File-destination-mover

<https://github.com/rishabh137/file-destination-mover>

- Implemented an automated Python solution to sort downloaded files into designated folders by file type, leading to a 60% decrease in manual file organization and streamlining workflow processes.
- Simplified file management by categorizing files automatically.
- Handled common file types such as .mp3 (Music), .mp4 (Videos), and .jpg/.png (Pictures).

Certifications

Cisco Networking Academy

- Acquired comprehensive networking skills, including fundamentals, protocols, and security.

Education

Sant Longowal Institute of Engineering and Technology

August 2022 - Current

Bachelor of Engineering (Computer Science and Engineering)

Punjab, India

Sant Longowal Institute of Engineering and Technology

August 2019 - June 2022

Diploma in Computer Science and Engineering

Punjab, India
